1000 RAM X

Part Number – call 816-741-0282

RAM X Tri-lobe rotary positive displacement blowers feature ROOTS WHISPAIR™ discharge design which, when combined with tri-lobe impellers, delivers quieter operation than conventional tri-lobe blowers.

- Heavy-duty unit with integral-shaft ductile iron impellers with an involute profile
- Rigid one-piece casing, headplates and end covers are grey iron
- Carburized and ground alloy steel spur timing gears
- Cylindrical roller bearings
- Piston rings reduce air leakage
- Hydrodynamic oil seals prevents oil from entering the air chamber
- Splash oil lubricated gears on drive and gear ends
- Detachable steel mounting feet
- Horizontal and vertical configurations available

816-741-0282

Quick Specs

Flow Range	to 5399 CFM
Max ΔPressure	12 PSI
Max ΔVacuum	16" Hg
Maximum RPM	2670
Minimum RPM	480
Max ΔT	230°F
Option 1 - Rectangular Connection	14" x 32"
Option 2 - Flange Connection	14" Flange
Shaft Dia.	70mm/2.75"
Min Sheave Dia.	13.2"
Drive End Lubrication	Oil
Gear End Lubrication	Oil
Oil Sump Horiz Config	~376 oz
Oil Sump Vert Config	~224 oz
Bare Unit Weight	2500 lbs (1)
Bare Unit Weight w/Adapters & Feet	2870 lbs (2)
Shipping Weight on Skid	~2550 lbs (1)
Shipping Weight on Skid	~2920 lbs (2)
Recommended to Ship Via	Truck
Container	Wood Skid
Skid Size (L x W x H)	54" x 48" x 36"

Repair kits are bundled with the parts you need to complete a standard repair. It is more cost effective to buy a repair kit than to purchase individual parts. However, if you need parts not listed in the kit, it is recommended that you call Pathfinder Systems for parts pricing.

816-741-0282

Table 2 - Recommended Oil Grades

Ambient* Temperature °F (°C)	ISO Viscosity No.
Above 90° (32°)	320
32° to 90° (0° to 32°)	220
0° to 32° (-18° to 0°)	150
Below 0° (-18°)	100

*Ambient temperature is defined as the temperature of the space in which the blower and drive are located.

Use a good grade of **industrial type** non-detergent, rust inhibiting, anti-foaming oil and of correct viscosity per Table 2. Roots synthetic oil (Roots P/N 813-106-) is **specified and recommended**. Roots does not recommend automotive type lubricants, as they are not formulated with the properties mentioned above.

Due to sludge build-up and seal leakage problems, Roots recommendation is DO NOT USE Mobil SHC synthetic oils in ROOTS blowers.

Table 3 - RAM X™ Approximate Oil Sump Capacities

Model Number/ Drive Shaft Location	Gearbox		Drive End	
	Fluid Ounces	Liters	Fluid Ounces	Liters
155,225,280 (left or right)	36	1.06	19	0.56
155, 225, 280 (top or bottom)	18	0.52	9	0.27
400, 500 (left or right)	95	2.81	50	1.48
400, 500 (top or bottom)	55	1.63	28	0.83
600, 770 (left or right)	155	4.59	70	2.07
600, 770 (top or bottom)	80	2.37	40	1.18
800, 1000 (left or right)	256	7.6	120	3.5
800, 1000 (top or bottom)	144	4.3	80	2.37

These capacities are provided to assist stocking the correct amount of oil. Exact sump capacity may differ slightly. See "Lubrication" section for proper filling instructions.

RAM X™

ROOTS™ RAM X™ Tri-Lobe Rotary Positive Displacement Blowers

Models 155, 225, 280, 400, 500, 600, 770, 800, 1000

The ROOTS™ RAM X™ tri-lobe positive displacement blower has been designed to incorporate the latest technology for reduced noise and vibration and minimal downstream pulse. This series is based upon the field operation success of ROOTS RAM™ blower series and features state-of-the-art engineering based on tri-lobe principles originally designed by Roots.

BLOWER DESCRIPTION

RAM X tri-lobe rotary blowers are heavy-duty units with high strength integral-shaft ductile iron impellers designed for maximum efficiency. The blowers feature ROOTS WHISPAIR™ discharge design which, when combined with tri-lobe impellers, delivers quieter operation than conventional tri-lobe blowers.

The headplates and rigid, one-piece cylinder are cast iron, while the drive-end and gear covers are aluminum (cast iron for models 600-1000). Carburized and ground alloy steel spur timing gears are taper mounted on the shafts and are secured with a locknut (bolt for models 800-1000). Cylindrical roller bearings are used to accept side loads from v-belt drives.

Piston rings reduce air leakage through the shaft openings in the headplates and hydrodynamic oil seals prevent lubricant from entering the air chamber. RAM X blowers incorporate thrust control, with splash oil lubrication at both ends of the blower.

All model sizes are designed with detachable rugged steel mounting feet which permit in-field adaptability to either vertical or horizontal installation requirements.

The top shaft is adaptable for drive on side outlet blow-

ers, and either shaft can be extended for drive on top or bottom outlet blowers.

DESIGN FEATURES AND BENEFITS

- Tri-lobe impellers for less vibration and minimal downstream pulse
- WHISPAIR discharge design combined with tri-lobe impellers for quieter operation than conventional tri-lobe blowers
- Carburized and ground alloy steel timing gears for long life and consistent performance
- Cylindrical roller bearings for longer bearing life
- Piston ring seals for less air leakage
- Splash lubrication from oil sumps with sight glasses on each end for easy maintenance
- Detachable feet and drive shaft extension to adapt to horizontal or vertical configuration

WARRANTY PERIOD

Models 155-500: Twenty-four (24) months from date of original unit start-up or 30 months from date of original shipment, whichever occurs first.

Models 600-1000: Twelve (12) months from date of original unit start-up or 18 months from date of original shipment, whichever occurs first.

OUTLINE DRAWING & DIMENSIONS

Dimensions are in inches (except U and Keyway are mm), weight is in pounds.
