Repair Kits

Repair kits are bundled with the parts you need to complete a standard repair. It is more cost effective to buy a repair kit than to purchase individual parts. However, if you need parts not listed in the kit, it is recommended that you call Pathfinder Systems for parts pricing.

ROOTS™ Universal RAI®-G Rotary Positive Gas Blowers

Frames 32 thru 615

BASIC BLOWER DESCRIPTION

Universal RAI®-G gas blowers are heavy duty rotary blowers designed with mechanical seals. The detachable rugged steel mounting feet, permit adaptability to either vertical or horizontal installation requirements. The compact, sturdy design is engineered for continuous service when operated in accordance with speed and pressure ratings.

The basic model consists of a cast iron casing, carburized and ground alloy steel spur timing gears secured to steel shafts with a taper mounting and locknut, and cast iron involute impellers. Oversized anti-friction bearings are used, with a cylindrical roller bearing at the drive shaft to withstand V-belt pull. The Universal RAI®-G features splash oil lube on the gear end and grease lube on the drive end.

Accessories are available through our distributors.

ROOTS™ Synthetic Oil and grease is recommended to maintain warranty.

OPERATING PRINCIPLE

Two figure-eight lobe impellers mounted on parallel shafts rotate in opposite directions. As each impeller passes the blower inlet, it traps a definite volume of gas and carries it around the case to the blower outlet, where the gas is discharged. With constant speed operation, the displaced volume is essentially the same regardless of pressure, temperature or barometric pressure.

Timing gears control the relative position of the impellers to each other and maintain small but definite clearances. This allows operation without lubrication being required inside the gas casing.
